

# Symantec Brightmail Gateway Small Business Edition

Easy-to-use, award-winning messaging security for inbound and outbound protection

## Overview

The Symantec Brightmail™ Gateway Small Business Edition is an easy-to-use, all-in-one email security appliance that delivers comprehensive protection from viruses, spam, phishing, and spyware. It is affordable and is built on the same technology that protects over 800 million mailboxes including large enterprises and government agencies worldwide. With Brightmail Gateway Small Business Edition, companies can effectively respond to new email threats and prevent confidential information from leaving the company network at a minimal ongoing cost.

## Key Benefits

### Uncompromising protection

- 24x7 real-time protection provided by Symantec's Global Intelligence Network, which includes over 120 million antivirus sensors, 40,000 firewall and intrusion detection sensors, and Symantec's patented Probe Network of over 2.5 million decoy accounts, across 70 countries
- Unique antispam solution adapts to your local threat

conditions by tracking the reputation of malicious senders targeting your environment

- Leverages technology built and refined over 10 years; catches more than 99% of spam while making fewer than 1 in 1,000,000 mistakes

### Powerful and easy-to-use management

- Less than 15 minutes initial setup time, with no requirements for tuning, white listing, or black listing
- Intuitive Web-based interface provides real-time reporting and management along with access to end-user spam and content filtering quarantines

### Smart investment, today and tomorrow

- Address growing email volume challenge without buying additional hardware
- Lower total cost of ownership with minimal ongoing administrative overhead
- Succeed with the world's #1 security software vendor that addresses all your security needs, today and tomorrow

### Key Features

- Self-learning email appliance leverages both real-time global reputation and local reputation scoring; catches more than 99% of spam with 99.9999% accuracy
- Integrated IM protection against viruses and spim (IM-based spam), including the industry's first zero-day threat protection from IM-borne viruses and worms
- Out-of-box installation with less than 15 minutes setup time, zero maintenance, and no tuning required
- Advanced content filtering scans inbound and outbound messaging traffic and safeguards confidential information
- Reliable and effective antivirus protection, including zero-day protection, with the only industry record of over 40 consecutive VB100 awards since November 1999
- Scalable appliance provides 3-year warranty and protection against more than 400% growth in traffic
- Centralized management is included free of charge, along with easy-to-use reporting
- Continuous automated rule updates from the world's most extensive Symantec Global Intelligence Network to help ensure effective, real-time protection against new threats

### System Requirements

Appliance model	8340
Organization	SMB (up to 1000 users)
Typical deployment	Combined control center/scanner
Form factor	1 RU rack mount
Power supply	Single
CPU	Single processor
Hard drive	2 x 80GB Serial ATA RAID 1
NIC	Two Gigabit Ethernet ports

### Supported platform

The Symantec Brightmail Gateway Small Business Edition is deployed on Brightmail/Mail Security 8340 hardware appliances that are designed for small and medium businesses.

### Clients (Internet browsers)

- Microsoft Internet Explorer 6.0, 7.0
