

Trend Micro™

PortalProtect™ for Microsoft™ SharePoint™

High-Performance, Easy-to-Manage SharePoint Security

More companies today are using Microsoft™ SharePoint™ to connect employees, partners, and even vendors and customers. In addition, they are using more SharePoint capabilities—not just content repositories but also team sites, intranet and extranet portals, wikis, and blogs. These dynamic collaboration environments help optimize productivity, but unfortunately, they also multiply your security risks. File sharing and the real-time interactivity of Web 2.0 open more doors for cybercriminals to infiltrate and steal your data.

Trend Micro™ PortalProtect™ for Microsoft™ SharePoint™ protects against threats and data loss to ensure your collaboration systems are secure. Leading malware protection keeps infected files out of your SharePoint environment—from repositories to blogs. Plus “true file type” detection and content filtering guard against data loss and theft. In addition to proven protection, PortalProtect delivers twice the performance speed¹ and requires half the administration²—compared to Microsoft™ Forefront™.

KEY FEATURES

Leading SharePoint Antivirus & Antispyware

- Blocks infected files from entering SharePoint
- Protects data from corruption and theft
- Stops high-risk files based on “true file type”
- Prevents threats from spreading among users

High Performance, Low Latency

- Scans twice as fast as other solutions¹
- Optimized with intelligent file inspection
- Speeds throughput with multi-threading
- Minimizes bandwidth usage, CPU utilization, and latency

Low Administration

- Requires half the administration time²
- Automates updates and routine tasks
- Enables anytime access with a web console
- Consolidates logs, reports and policy creation
- Integrates with strategic Microsoft tools, including Digital Dashboard and Web Parts

Enterprise Scalability

- Supports hundreds of thousands of users
- Installs efficiently through remote deployment
- Optimized with agent-less database inspection
- Scales to any deployment size
- Utilizes SharePoint AV manager to avoid database corruption

SOFTWARE

Protection Points

- SharePoint server

Threat Protection

- Viruses
- Worms
- Trojans
- Spyware
- Data loss & theft

KEY BENEFITS

- Protects SharePoint users and data
- Stops the wide range of malware
- Takes half the time to manage
- Delivers twice the performance
- Scales to any deployment size

SHAREPOINT PROTECTION

Trend Micro™ Communication & Collaboration Security

PortalProtect is a key component of >>Communication & Collaboration Security—a 4-in-1 solution that protects all of your Microsoft email, IM, and collaboration systems. Together—with centralized management, optimized performance, and tight platform integration—this single solution further reduces administration.

Trend Micro Communication & Collaboration Security delivers an airtight defense against the wide range of threats at multiple points and attack vectors.

| Communication & Collaboration Security | IM Security | ScanMail Suite | PortalProtect |
|------------------------------------------|-------------|----------------|-----------------------|
| Protection Point | IM Servers | Mail Servers | Collaboration Servers |
| Web Reputation | ✓ | | |
| Email Reputation | | ✓ | |
| Antivirus | ✓ | ✓ | ✓ |
| Antispyware | ✓ | ✓ | ✓ |
| Antispam | | ✓ | |
| Antiphishing | ✓ | ✓ | |
| Content Filtering & Data Leak Prevention | ✓ | ✓ | ✓ |

| SYSTEM REQUIREMENTS |
|-----------------------------------------------------------------------|
| CPU |
| • Intel™ Pentium™ III compatible processor |
| Memory |
| • 512MB or more |
| Desk Space |
| • 250MB free disk space; 8MB for the /tmp directory |
| Microsoft™ SharePoint™ Environment |
| • Microsoft SharePoint Portal Server 2003, 2007 |
| • Microsoft Windows SharePoint Service 2.0, 3.0 |
| • Microsoft Windows 2003 Server |
| • Microsoft SQL Server 2000 SP3 or above |
| • Microsoft Internet Explorer 5.0 (or above) for Web-based management |
| • Microsoft Internet Information Services (IIS) 6.0 |

>>Trend Micro™ Enterprise Security is powered by our Trend Micro™ Smart Protection Network, unique in-the-cloud technology that correlates threat data in real time—so you get immediate protection with less complexity.

>>Trend Micro Communication & Collaboration Security leverages the Smart Protection Network to stop threats faster and minimize administration.

PROVEN PROTECTION LOW ADMINISTRATION

PortalProtect is built on the same technologies that make >>Trend Micro™ ScanMail™ an industry leader. Both products deliver powerful protection, optimized performance, and low administration.
